Suite # C-305  
Austin, Texas 78745

Dear Dale:

I wanted to take the time to thank you for your business with the recent Cisco voice/data systems implementation for which we partnered. It was a pleasure to work with you and your team on that project. Your system is a complete turnkey solution in which voice, call center, data, and network security components were integral. We certainly appreciate the opportunity to serve our customers on this type of solution. I'm also excited about your decision and insight to embrace some of the latest and greatest network technologies to further enable your business. This mindset provides for improved productivity of your business and its employees and ultimately provides for greater efficiency in serving your clients. Thanks again for allowing INX to be part of that success!!

The service that HealthYes! provides to our community is invaluable. I recently had an experience in a health situation with one of my other customers that seriously punctuates the need for services like that which HealthYes! provides. My customer was in his late thirties and died of a heart attack without much warning at all. I don't believe he had any prior health screenings or known issues for that matter, but I'm certain that his condition could have been addressed prior to it becoming a life threatening problem. This has encouraged me to take my health a lot more seriously and I plan to have some preventative screenings performed for my family.

Again, thank you for your business, but more so, thank you for the service that you provide to our community. It really makes my job more worthwhile when I can serve an organization that is really working to make a difference in our world.

Best regards,
